B 2 Which planet

A was discovered in the last century?

B is the hottest?

C got its name after a Roman god ?

D is known for its density?

E comes the second after Jupiter in size?

F was discovered by a musician?

G is believed to have water on the surface?

1 Venus, one of the planets in the solar system, is the second in distance from the Sun. Except for the Sun and the Moon, Venus is the brightest object in the sky.

4. Uranus is a major planet in the solar system. Uranus has 11 known rings and 27 moons. Uranus was the first planet that people discovered by using a telescope. Sir William Herschel, a German-born British musician and astronomer, discovered the planet in 1781.

5. Mercury is the closest planet to the Sun. Mercury is surprisingly dense because it has a very large iron core. Mercury's surface is similar to the Moon's because many asteroids constantly fall on it

6. Saturn is the second largest planet in the solar system. Saturn has its own ring system which was first seen by the Italian scientist Galileo in 1610. He did not understand that the rings were separate from the body of the planet. Later the rings were described correctly.

Прочитайте текст. Определите, какие из приведённых утверждений A5-A8 соответствуют содержанию текста (1 - True), какие не соответствуют (2 - False) и о чём в тексте не сказано, то есть на основании текста нельзя дать ни положительного, ни отрицательного ответа (3 - Not stated).

William Shakespeare, the greatest English writer of drama, was bom in 1564 in Stratford-on- Avon. We do not know everything about Shakespeare's early life. But we know that he studied at the Grammar School in Stratford, and that he became interested in the theatre when he was still a boy.

In 1586 Shakespeare went to London, where he worked in the theatre for some years before he began to write his own plays.

The planet is called the morning star when it appears in the east at sunrise, and the evening star when it is in the west at sunset. Venus is never visible more than three hours before sunrise and three hours after sunset. The surface temperature is the hottest of any planet - about 477C.

2 Jupiter is the largest planet in the solar system. It is the fourth brightest object in Earth's sky, after the Sun, the Moon, and Venus. The Romans named the planet for their chief god, Jupiter, because of its prominence in the sky. Jupiter is a ball of gas and has no solid surface.

3 Pluto is farther from the Sun than the other planets in the solar system. The small, rocky, and cold planet takes 247,7 years to revolve around the Sun. It was discovered in 1930. Pluto is the most distant planet in the solar system and it is very difficult to be detected.

century Shakespeare and his friends had enough money to build their own theatre - the famous Globe Theatre.

But Shakespeare had quite many difficulties in his life. Less talented writers, whose plays were worse than his, often quarreled with Shakespeare and attacked him, the actors in his own theatre sometimes turned against him.

Now people in many countries love and honor Shakespeare for his plays, comedies and tragedies that are still modern and well-known all over the world.

A5 People know little about Shakespeare's early life.

1)True 2)False 3)Not stated

A6 The writer spent all his life in Stratford-upon-Avon.

1) True 2) False 3) Not stated

Shakespeare soon became well-known in London literary circles. Every play that he wrote was good news to the people of the capital. Queen Elizabeth I liked Shakespeare's plays, and the actors were often invited to play before the Queen and later before the King James - a great honor in those days. By the end of the 16th
